

🎯 Profile Overview

Education	Bachelor's in Artificial intelligence
Career Goal	Tech (Technical)
Known Skills	Python, JavaScript, React, SQL, Machine Learning, UI/UX

🏆 Top Career Recommendations

Role	Match Score	Key Required Skills
Cloud Architect	97%	Relevant to your Python
Data Scientist	94%	Relevant to your Python
Machine Learning Engineer	92%	Relevant to your Python

★ Targeted Skills to Acquire

Amazon Web Services (AWS)	Google Cloud Platform (GCP)	Distributed Systems
---------------------------	-----------------------------	---------------------

📖 Strategic Action Plan

- 1Enhance knowledge of cloud platforms (AWS, GCP, Azure) and their services
- 2Develop skills in distributed systems and microservices architecture
- 3Apply machine learning and data analysis skills to real-world problems
- 4Build a personal project that integrates cloud computing, machine learning, and data analysis

📖 Recommended Resources

Cloud Computing Specialization	Data Engineering with Python
Machine Learning with TensorFlow
